1 Regional Development and the Environment in the Context of Multi-Level-Regulation: An Introduction	13
1.1 The rise of the container economy in Northwest Germany: A case of regional transformation	13
1.2 Controlling regional socio-environmental profiles: An actor-oriented perspective on regulation, governance and policy integration	22
1.3 Investigating a case of multi-level policy making and regulation: Methodological approach	30
2 Europeanization, Governance and the Environment under Conditions of Globalization	35
2.1 Globalization, Europeanization and analytical adequacy	35
2.1.1 Globalization	35
2.1.2 European integration in global perspective	42
2.1.3 The Europeanization of governance	45
2.2 Investigating governance	54
2.2.1 Governance as a contested concept	54
2.2.2 The institutional environment for sustainable governance	60
2.3 Greening the market? Environmental policy and the quest for regulative capacity	74
2.3.1 The evolution of environmental policy	75
2.3.2 New challenges: Environmental governance in an interdependent multi-level system	82
2.3.3 Competing perspectives on multi-level interactions and the future of environmental policy	93
	5

3	Governance and the Environment from a Regional Perspective	97
3.1	The region within globalization	97
3.2	A multi-level perspective on regions	107
3.2.1	Government layers from a local policy research perspective	107
3.2.2	Regions as subjects of spatial restructuring	118
3.2.3	The local arena's environment	128
3.2.4	Regions and regulative quality: Challenges and changes	137
4	An Actor-Oriented Synthesis	153
4.1	Institutionalism and institutional change	155
4.2	Linking institutionalism to discourse analysis	162
4.3	Socio-environmental arrangements as a research concept	171
5	The Containerization of the Global Transport Chain	179
5.1	Overview	179
5.2	Strategies in the container industry: Technological trends, economic forces and actors	185
5.3	North Range and South Range: Competition and dynamics in the European transport chain	192
5.4	Changing faces: The restructuring of European ports and their hinterlands	197
6	Restructuring the German Bay	205
6.1	The Northwest in the Federal Republic of Germany: A socio-economic and institutional overview	205
6.2	A race to the coast? Major interests and their stakes in the German coastal zone	223
6.2.1	Political and administrative coordination within the planning system	223
6.2.2	Nature conservation	229
6.2.3	Wind energy	232
6.2.4	Mining	234
6.2.5	Coastal protection	235
6.2.6	Fishing	236

6.3	The German hubs: Regional cooperation, competition and adaptation costs	237
6.3.1	From growth to crisis: The maritime cluster in the German hubs until 1990	237
6.3.2	Port extension policy under conditions of structural change	246
6.4	Competing for a new boom? The regional stage since the 1990s	249
6.4.1	Hamburg	250
6.4.2	Bremen and Bremerhaven	256
6.4.3	From competition to cooperation? Choosing the location for a third German hub	263
6.4.4	Accelerated growth and renewed extensions	273
6.4.5	Reconfiguration of procedural risks	278
6.5	Involving the federal level: National coordination and the promotion of coastal infrastructure development	287
6.6	Playing the European card: National and regional actors between compliance and reinterpretation of European regulations	303
7	Regulated Transition? Actors, Institutions and Discourses Determining the German Container Port Region and its Environment	325
7.1	The socio-environmental arrangement of containerization	328
7.1.1	The regional level	328
7.1.2	The national level	342
7.1.3	The European level	346
7.1.4	Amalgamation	348
7.2	Regulating regional transformation? A theoretical conclusion	353
